

### **Statement of Lead Content in Inks**

Gemline is committed to providing high quality, safe products for our customers. We have worked with our vendors and our supply chain partners to implement a process to help ensure that our raw materials meet federal and state health and safety standards, including California Proposition 65.

Gemline purchases inks from well-established, reputable suppliers in the United States. We have worked closely with our ink suppliers to test and document lead content for all ink systems we currently use to decorate our product. The lead content of these inks meet all current regulations.

If you have a specific compliance need, please feel free to contact us directly.
