

## Introducing our new checkpoint-friendly product line designed to help you fly through airport security.

These products were designed to enable users to quickly and efficiently get through airport security based on the new TSA regulations. Each bag features a separate but attached computer carrier that allows laptops to connect to the bag for fast and easy screening on the X-ray belt.

**NEW**

Viewpoint System™ makes it easy to fly through airport security.

Front zippered pocket features multi-function organizer

Three easy steps to help you breeze through airport security:

1: Place bag face down and unzip Viewpoint pocket

2: Pull out Viewpoint holder with secured laptop and place bag on X-ray belt for quick scanning. No need for plastic bins.

3: Rest assured there's nothing left behind—grab your bag and go!
